PROFILE

I'm a Full Stack MERN Developer with 3+ years of hands-on experience working on both personal and real-world practice projects. I enjoy building complete web applications using MongoDB, Express.js, React.js, and Node.js. I've worked on creating responsive frontends, developing secure backend APIs, handling database structure, and deploying full projects from start to finish. I like writing clean, simple code and practically solving problems. Right now, I'm focused on improving my skills further and learning modern tools and techniques to build faster, more scalable, and user-friendly web applications.

SKILLS

Frontend Technologies

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Tailwind CSS
- TanStack Query
- Redux Toolkit
- Responsive Web Design
- CSS Flexbox & Grid
- DOM Manipulation
- Cross-Browser Compatibility

Backend Technologies

- Node.js
- Express.js
- RESTful APIs
